Citizen Scientists Wanted!

National Park Service
U.S. Department of Interior

**Have you ever wanted to be a citizen scientist?
If you missed participating last year, you have a second chance!**

Dragonfly Study:

Dragonfly larvae are currently being sampled for mercury levels in many national parks. Mercury is a toxic pollutant that can harm human and wildlife health, threatening the natural resources the NPS is charged with protecting.

Salamander Monitoring:

Ongoing scientific monitoring program for park natural resource statistics and indicator measures.

Date: The Dragonfly project begins on Tuesday June 14th, with a series of data collecting dates through out the summer.

Time: 2:00—4:30

Where: Meet at the Henry A. Wallace Visitor and Education Center front desk.

Date: The salamander study begins on June 22 with a series of data collecting dates throughout the summer.

Time: 1:00—3:30

Where: Meet at the Farm Lane Trail Parking Lot, Rt. 9

To become a citizen scientist contact Susanne Norris at 845-229-6873 or
